

Providers of Hybrid Multi-Cloud Solution Trust Cloud

About Trust Systems

As a company we have a proven track record of working with global commercial clients to deliver managed services. As an organisation we offer whole life cycle solutions, including in-house consultancy, design, implementation and support services. Through our team of 60+ experts plus our strength in working in partnership with Crown Hosting, Nutanix, Supermicro and Lenovo we deliver a service where we **Consider, Configure, Deploy and Manage**.

In partnership with Nutanix and Crown Hosting our offering is delivered from leading government approved and sustainable datacentre, Ark Data Centres.

Proven - Ark Data Centres

Since 2015 we have provided Ark Data Centres with IT Architecture Services and technology to manage their infrastructure for new build, business a usual and next generation refresh. Services include:

- Architecture consultancy for building new and existing infrastructure
- Network monitoring software; an intrinsic part of delivering a robust large-scale network to Ark
- On site expert resource
- Extended hour service desk provision-managing infrastructure
- Hardware provision and deployment

'Trust Systems is a partner who has supported our extensive development and growth plans. Working with a supplier you know can deliver when our ethos is to provide customers with a solid, robust and secure service is absolutely essential.'

**Andy Garvin, Director,
Design, Build and Operate, at Ark Data Centres**
